MOKA ESWAR

I would suggest removing this awards medal image from your resume.

I would encourage you to use a different type of symbol for your bullet points throughout your resume. Using a sigma doesn't really make sense and makes your resume slightly difficult to read.

I would add your LinkedIn profile as a link under your contact section instead of having it at the bottom of your resume as a QR code. Your resume will likely get reviewed virtually so a hyperlink would serve better than a QR code.
